SUMMARY

Software developer with 4+ years of professional experience in Unity (C#) and hands-on experience building and deploying production web applications using React, Next.js, and modern APIs. Experienced in owning features end-to-end, integrating third-party services, and delivering polished user experiences.

EXPERIENCE

Software Developer (Contract) | US Soccer Federation

February 2026 - March 2026, Remote

- Implemented user-facing features and resolved production issues in a Next.js/TypeScript application used for referee evaluation and approval workflows.
- Enhanced data review workflows through pagination, filtering improvements, and targeted UI refinements.
- Independently completed assigned Jira tickets while collaborating with developers through pull requests and peer code reviews.

Unity Developer | Gamucatex

February 2024 - July 2025, Remote

- Developed core gameplay and narrative systems in Unity using C#, including dialogue flow, save systems, unlockable content, and data-driven state management driven by player choices.
- Improved deckbuilder and player HUD usability by applying UX best practices and iterative feedback.
- Collaborated with designers to implement and refine gameplay mechanics, ensuring smooth feature integration.

Broadband Engineer | Windstream Communications

January 2015 - January 2022, Lexington, Ky

- Led design engineering efforts for Ohio and Pennsylvania broadband infrastructure initiatives.
- Oversaw deployment of 1,500+ DSLAM expansion plans, improving service availability and reliability.
- Provided remote troubleshooting support to field technicians, resolving equipment, configuration, and network connectivity issues in production environments.
- Collaborated with fellow engineers to uphold the integrity of existing broadband infrastructure, leveraging tools such as JIRA, Confluence, and Quickbase for documentation and maintenance workflows.

INDEPENDENT SOFTWARE DEVELOPMENT | 2022-PRESENT

WoW Guild Website | Next.js, React, REST, GraphQL, OAuth - <https://raise-your-eyes.vercel.app>

- Designed and built a live production web application used by an active online gaming community.
- Implemented secure OAuth authentication and server-side data fetching.
- Integrated and normalized data from multiple third-party REST and GraphQL APIs to display real-time roster and progression data.
- Deployed and maintained the application on Vercel, handling ongoing updates and bug fixes.

Portfolio Website | React, Node.js, Railway

- Built and deployed a responsive portfolio website using React and Railway.

Extinguished | Unity (C#)

- One-week game jam project placing **34th out of 496 entries**.
- Implemented enemy AI behaviors, movement systems, and core gameplay logic.

Sprout | Unity (C#)

- 10-day game jam project placing **77th out of 1,026 entries**.
- Built core gameplay systems and progression mechanics using free assets.
- Collaborated with an artist and sound designer to deliver a polished player experience.

EDUCATION

[Bachelor of Science in Electrical Engineering](#) | University of Kentucky

Minor in Mathematics, United States, 2014

CERTIFICATIONS

[Oracle Cloud Infrastructure AI Foundations Associate, Ahrefs Technical SEO Certification](#)

SKILLS

Languages: C#, C++, Java, SQL, JavaScript, TypeScript, HTML

Web Development: React, Node.js, Next.js, Tailwind CSS, REST APIs, tRPC, MUI, GraphQL

Frameworks & Tools: .NET, GitHub, Git, JIRA, Railway, Vercel

Game Development: Unity, Unreal Engine, Gameplay Programming, UI/UX Design, Optimization, Unity Assets, Shader Graph

Soft Skills: Problem Solving, Communication, Collaboration, Attention to Detail
